About Me

Full-Stack Developer with hands-on experience building scalable and high-performance web applications using **React.js**, **Next.js**, **Flask**, **Node.js**, **JavaScript**, and **TypeScript**. Skilled in **RESTful API design**, **JWT authentication**, and **backend architecture** with experience in **MongoDB**, **PostgreSQL**, **Redis**, and **SQLAlchemy**. Strong understanding of **Data Structures**, **OOP**, **DBMS**, and software engineering principles.

Work Experience

Philips Healthcare

Bengaluru, Karnataka

Software Development Engineer – **React.js**, **Flask**, **MongoDB**, **PostgreSQL**

June 2024 – January 2026

- Developed a **scalable multi-step onboarding platform** using **React.js**, **Flask**, and **MongoDB**, implementing **RESTful APIs**, backend validation, and optimized data workflows to streamline developer onboarding processes.
- Built a **full-stack monitoring system** used across **10,000+ hospitals** to track runtime, scan counts, and operational issues by designing **scalable backend services** for data aggregation, filtering, and **real-time operational insights**.
- Migrated **10+ legacy .NET components** to **React.js** and developed an **MR application launcher** enabling independent execution of post-processing tools, improving application modularity, maintainability, and system performance.

Philips Healthcare - Intern

June 2023 – May 2024

Software Development Engineer Intern – **React.js**, **.NET**

Bengaluru, Karnataka

- Developed a **string compression and decompression algorithm** using **Burrows-Wheeler Transform**, **Run-Length Encoding**, and additional modifications to ensure efficient data compression and decompression.
- Resolved **keyboard positioning** and **Chinese language rendering** issues after configuration updates, improving UX.
- Enhanced **search functionality** and resolved bugs across **micro frontend applications**, improving performance.

Academic Projects

RealTime News Application | **React.js**, **CSS3**

[GitHub](#) 🐙

- Built a responsive news application using **React.js** and **REST APIs** to display live news headlines.
- Fetches and renders live news data by country and category to provide updated worldwide news coverage.
- Implemented **search functionality** to quickly find news articles using keywords and custom topics.

Bank Account Blockchain Project | **React.js**, **Motoko**, **CSS**

[GitHub](#) 🐙

- Built a decentralized banking application using **React.js** and **Motoko** with secure fund transfers.
- Implemented **Map-based storage** in **Motoko** for secure balance management and fast transactions.
- Developed features including account creation, login/logout, balance tracking, and secure user transactions.

Coding Achievement and Certifications

- Solved **800+ DSA problems** on **LeetCode** and earned the **Knight** badge with a rating of **1914**.
- Achieved **3-Star** rating on **CodeChef** and secured **48th rank** in the **Starters 63** contest.
- Secured a **Top 100** position in **Coders Combat**, organized by **LPU** and **GeeksforGeeks**.
- Earned the **DSA Self-Paced Certification** from **GFG**, strengthening concepts in **Data Structures and Algorithms**.

Technical Skills

- Core** : Data Structures, Algorithms, Operating System, OOPs, DBMS
- Languages** : C, C++, Python, C#, JavaScript, TypeScript
- Technologies** : React.js, Flask, SQL, MongoDB, PostgreSQL, Redis, HTML, CSS, Tailwind CSS, Bootstrap, .NET
- Tools and Services** : Git, GitHub, VS Code, Visual Studio, Postman

Education

Lovely Professional University

Bachelor of Technology in Computer Science

2020 - 2024

Phagwara, Punjab
